Mohamad Nikparvar

Product Owner | Odoo ERP Implementation Lead | Supply Chain

Tabriz, Iran | +98 914 850 2709 | muhammad10nikparvar@gmail.com | Portfolio: mohamadnikparvar.ir | linkedin.com/in/mohamad-nikparvar-5214aa209

SUMMARY

Product Owner and Odoo ERP implementation lead with a B.Sc. in Industrial Engineering from Sharif University of Technology and a background in software development. Leads supply chain product development full-time at Bulut and runs multi-country Odoo implementations for Elison (Huger Holding) and independent clients. Known for restarting stalled projects and delivering them quickly: a warehouse management system that had stalled for two years launched as an MVP in three months, and an Odoo rollout across 8 companies went live in three months instead of the 7 to 8 months other teams estimated. Enjoys turning complex business problems into simple, working systems and helping teams deliver them.

CORE SKILLS

Product management: Product ownership, backlog management, user stories, acceptance criteria, sprint planning, roadmapping, OKRs, PRD, BRD, Scrum, Agile, SDLC

ERP and Odoo: Odoo implementation, configuration and customization, Odoo Studio, multi-company setup, data migration, UAT, user training, ROI analysis

Supply chain: Inventory management, Warehouse Management System (WMS), procurement, purchasing, manufacturing, sales, POS, CRM

Business analysis: Requirements engineering, business process management (BPM), As-Is / To-Be process mapping, gap analysis, requirement elicitation, solution design

Tools: Azure DevOps, Microsoft Azure, ClickUp, Trello, Figma, React, Next.js, TypeScript

PROFESSIONAL EXPERIENCE

Product Owner, Bulut (Shoniz Tech Team) **Jan 2026 - Present**

Tabriz, Iran | Full-time, on-site

- Took over a supply chain product team that had gone about two years without a major release, and introduced Scrum and an SDLC-based delivery process.
- Own four supply chain modules: Warehouse Management System (WMS / Inventory), Procurement, Cataloging and Warehouse Request.
- Rebuilt the WMS (Inventory) from scratch and launched the MVP in 3 months, after a previous two-year effort had failed to ship it. The system is now in use at Shoniz.
- Shipped four major releases in 8 months, including a new Cataloging version, Warehouse Request and Requester v1, and the WMS MVP.
- Prototyped the Procurement module (ProcureFlow) in under a week from stakeholder user stories, using AI-assisted prototyping and Odoo 19 Purchase as the reference model.
- Write and maintain PRDs, BRDs, user stories and acceptance criteria; own and prioritize the product backlog.
- Run daily stand-ups with the development team and weekly stakeholder sessions to align business priorities with technical delivery.

ERP Implementation Team Lead, Elison (Huger Holding) **May 2025 - Present**

Dubai, UAE | Part-time, remote

- Led the Odoo ERP rollout across 8 companies in the holding, including D3 (multi-company across the UAE, KSA, Iraq and Pakistan), IX, NextLayer and Elison, with more than 100 users live.
- Completed the initial implementation in 3 months, against 7 to 8 months estimated by other teams.
- Saves the business $30K per year by replacing the previous system before its contract renewal.
- Implemented Supply Chain, HR, CRM, Project Management and Marketing modules, and configured and customized them to fit each company's workflows.
- Analyzed existing processes, identified gaps, and turned business requirements into functional and technical specifications.
- Managed project plans, scope and timelines; led data migration, UAT, user training and post-go-live optimization.

Odoo Implementation Lead, Independent Consultant **Jun 2023 - Present**

Iran | Freelance, leading own implementation team

- Lead a core team of an accounting manager (accounting modules) and two developers, adding specialists per project as needed.
- Deliver Odoo ERP projects for companies across several industries, focused on supply chain modules: Inventory, Purchase, Manufacturing and Sales.
- Clients include Syngenta, Gilsa, BiNiCi, Aref Saze Sadra, Zebrang, Rayshan and Baghboon, in Tehran, Isfahan, Tabriz and Shiraz.
- Acted as Odoo app expert on further projects, including Evimo (Istanbul) and Saman Daroo (Astan Quds Razavi, Mashhad).
- Run each project end to end: requirements, process mapping, configuration, data migration, UAT and training.

ERP Implementation Consultant, Altech Electric Ltd **Dec 2025 - May 2026**

Tehran, Iran | Part-time, remote

- Provided consulting on Odoo ERP implementation and ROI analysis.

Front-end Developer, Sonat (sonat.com) **Oct 2022 - Oct 2023**

California, US | Full-time, remote

- Built web application interfaces with Next.js, React, TypeScript, Ant Design and Material UI.

Front-end Developer, Shab (shab.ir) **Dec 2021 - 2022**

Tehran, Iran | Full-time, remote

- Built web application interfaces with Next.js, React, TypeScript, styled-components and Material UI.

EDUCATION

PhD in Management, preparing for the national entrance exam **Planned start 2027**

Master of Business Administration (MBA), Finance, Islamic Azad University, Tabriz, Iran **2023 - 2026**

Thesis: A Model of the Drivers of ERP Implementation (case study: Shoniz). Surveyed 250 managers and ERP users; built a three-factor model with factor analysis and regression (SPSS, Python) explaining 53% of rollout success.

Bachelor of Science in Industrial Engineering, Sharif University of Technology, Tehran, Iran **2017 - 2023**

CERTIFICATIONS

Odoo Functional Certification, Odoo **2024**

IBM Data Science Professional Certificate, Coursera **2021**

HONORS AND AWARDS

Top 1% in Iran's national university entrance exam (Konkur), Mathematics and Physics, among more than 130,000 candidates **2017**
